La Grange

LA GRANGE is situated on the Chicago, Burlington & Quincy Railroad, on the first high ground west of Lake Michigan, being 80 feet above the lake level. It is twelve and one-half miles from the Union Depot and has most excellent train service, there being twenty-two trains daily each way, running at frequent intervals, the average time being thirty minutes. It is also the present terminus of the Suburban Electric Line, which connects with the Lake Street and Metropolitan Elevated, taking patrons to the business center of the city in one hour.

La Grange, with its 6,000 inhabitants, is the most completely finished resident town around Chicago, furnishing every advantage that a city could afford and the rest and quiet of the country. The elevation gives perfect drainage; the sewer system is complete, and there are well paved streets and cement sidewalks throughout the village, shaded by beautiful trees; it has the purest artesian water; gas, both for fuel and illuminating, and electric lights. The stores are most excellent, and fresh products are obtained from the surrounding farms. There are churches of every denomination, each owning handsome property. The schools are ranked with the best in the state, there being kindergartens, two grammar schools, Nazareth Academy, and the Township High School. There are various social, literary and musical clubs, prominent among them being the "Suburban," a gentlemen's social club, and the "Country Golf Club," each owning beautiful buildings and grounds. One of the notable features is that there are no saloons or places of like nature in the village.

In brief, if you are looking for a suburban home, and particularly if you wish to get away from the sudden changes of climate incident to living near Lake Michigan, you could choose no more home-like, attractive, highly improved suburb than La Grange.

This booklet shows some of the public buildings and private residences in La Grange, to give an idea of the character of the village.
